Hemorrhage of the Lung or Spit Splitting of blood we find is not an uncommon symptom of the early or forming stage of consumption. It may occur in a very large number of cases long before any of the usual physical signs or symptoms of lung complaints are noticed by the patient, and when the persons themselves or friends, by ordinary observations, regard them as free from any

sesurance.
I would say to all who have ever beet troubled or subject to bleeding from the lungs, it matters not how small the quantity of blood expectorated may be, it speaks it terrible warning that tubercles already exist in your lungs, and that you will sooner of later fill a consumptive's grave unless you resort to the proper mode of freatment. How or the first particular remarks, after an attempt of the proper mode of the state of the first particular remarks, after and feet quite reheved and a great deal better, and imagine that they are going to get entirely well; but this is only a temporary matter as the following explanation of the change it symptoms will show:

As soon as the lungs relieve themselve from the increased amount of blood which has secumisted in them, the cheat at one feels lighter and more comfortable, and the operation of breathing is more naturally per formed, and, as I remarked before, this is only temporary relief, and under no circumstances which relief, and under no circumstances when the support of the complete of the first place is produced in the first place in the first place and, if no completely eradicated from the system b scientific medicajion, a fatai result is inevitable.

There is no time to be lost. The days and completely eradicated from the system by scientific medicalpuo, a fatai result is inevitable.

There is no fime to be lost. Another magnificent railroad enterprise has been inaugurated in the State of New York. An organization called the New York, West Shore and Chicago Railroad Company are about to commance the construction of a double-track road from the great metropolis to Buffalo, a dustance, by the route proposed, of 420 miles, which is the route proposed, of 420 miles, which is twenty-four miles less than the distance by the Hudson River and New York Central. The road will follow the west shore of the Hudson, close to the water's edge, until it reaches Catekill, when it will leave the river and go in an almost direct line to Schenectady on the Mohawk. Thence the route will lie along the west side of the Mohawk and Eric canal to Utica, from which it will run in a direct line to Buffalo, leaving Rochester some distance to the north. At Buffalo the road

will connect, through the International bridge, now being built, with the Great Western and Grand Trunk railways in Canada, and through them, and more especially through the Great Western, with the Michigan Central. The chief engineer, in his report to the directors, just published, proposes a double track of road of four feet eight and a half inches gauge, with cuts and embankments twenty-four with curs and embankments twenty-four feet wide at grade, the bridges to be of wrought iron, the rails of steel, weighing sixty pounds per yard, with ties of white oak and ballast of broken stone. The total cost of the 420 miles he estimates at \$30,213,500, or a little over \$62,000 a mile. This estimate, however, does not include the cost of station-bourse or criffing stock. the cost of station-houses or rolling stock. The New York Sun learns that the gen-

FPEECH OF EDGAR NEEDHAM, ESQ.

This ha State election, but the questions that are being discussed involve both State and rational politics. This may not be desirable in a purely local electroe, but owing to the complex form of our government its seems unsweldable. From the Governor of the State down through all the grades of local and municipal officers men are selected to fill official positions, not according to their general or particular knowledge and experience of the datase they are to perform, but according to the opinions they hold to restional politics. Much as we may regret this fact, in some of its aspects, we are compelled to accept it and act upon it. As every citizen is a votet, so every citizen is bound in some sense to be a political. And, reliowedissens, in my jadge measures and pridox idecussions of political will they are sometimes supposed to municipal they are sometimes appeared to municipal they are sometimes appeared to municipal they are sometimes appeared to municipal the contrary, if these discussions are conducted with furness and cander, as they certainly about be they are vite certainly accomplish much good.

In the discussions now going on throughout the State, our Democratic friends are constantly declaiming about the importance of the grade of the grade of the part of the dead of the part of the dead of the state of the stat

board, Kantheky Democracy was determined to be safe. With them it was "beeds I win tails you lose." And now in this year of grace 1871 this Democracy is somewhat was try up and rubbing its eyes, is getting ready for a "REW DEFARTURE."

A portion of the party has already taken the "departure." but the old chaps are allil noid. It can to the anxious seats, but give the connection with the important fast, that won to the anxious seats, but give the search of the defaults. So the decision of Gest. Grant the ermy has been reduced from 48,000 to 80,000

yard the nghts of the citizen which our Democratic friends are charging against GRN. GRAY AND THE BETURLICAN FART? As I understand, it is proceedy this. First: The Republican party hold that every bona nice citizen of the United States, who is entities to vote, shall have the privilege of cesting just one vote and no more at every legal excition, and that if this right is persistently refused to him by the State, or if the State local authorities refuse to protect him in the exercise of this right, then it is the duty of the Government or the United States of the content of the United States of the state local authorities refuse to protect him in the exercise of this right, then it is the duty of the Government or the United States of the third of the constitution of the United States of the third of the Constitution of the United States of the third of the Constitution of the Constitution. It is the duty of General Grant to see that this law is enforced. He says that if the necessity srises he will do it, and our Democratic friends have learned that General Grant means precisely what he says. They therefore decounce thm as a dictator, a tyrant, and a railor to the Constitution.

But way should Democrate thus complain? Have they not always been the advocates of the veto or one-man power whenever that power could be used for their advancement, or for the detent of the measures of their advancement, or for the detent of the measures of their advancement, or for the detent of the measures of their foradhesal ceiter, ought to be the last to complain of anything which General Grant has done or proposes to do.

paying enormous costs of transportation, you are compelled to cell your products in competition with the parper is bor of Europe." Tals, fellow-citizens, is the deliberate utterance of the foremost Democratic Congressman in Kentucky concerning the decadence of that portion of the American shipping engaged in foreign commerce. And now less that he report made to the Secretary of the Treasury, published in Hunt's Merchants' Magazine. It seems that American shipping engaged in foreign commerce bad a steady and rapid growth from 1830 to 1930. During the five years from 1850 to 1930. During the five years from 1850 to 1930. During the five years from 1850 to 1930. During the five years is to our foreign trade was double the foreign tonage, but during the last five years, 1835-70, American tonage has fallen off so that it is only one-half the amount of the foreign tonage. Formerly, two-thirds of our American Foreign commerce oroper was certed in our foreign tonage. Formerly, two-thirds of our American-Foreign commerce oroper was certed in our house-thand our tonage. Formerly, two-thirds of our American-Foreign commerce oroper was certed in our foreign tonage and the state of the commerce of the conduction of the foreign tonage and the state of the conduction of the foreign tonage and the state of the conduction of the foreign tonage was the foreign tonage and the foreign tonage and the foreign tonage was the foreign tonage and the foreign tonage was the foreign tonage and the foreign tonage was the foreign tonage was sold to foreigners than in the preceding forty. How an American Gestard and the provision in his heart, can talk as flippantly as Mr. Beck talks about the disastrous decadence of our foreign commercial marine is more than I can understand.

But this is only a part of the disasters brought upon our commercial marine by this Democratic recelling of the How an American Construction of the labor engage in the particle of the labor engage in marine by this Democratic recelling of the decadence of the labor en In the next place

question out of the region of Democratic face; into the BEGION OF FACT.

In Mr. David A. Wells' report to Congress on the rarief as it stood up to the first of December, 1879, he cives a table showing the amount of dutable imports and free goods imported annually from 1798 to 1885 inclusive. From this table it will be seen that from 1815 to 1815, the four years of the war with Great Britain, the average annual duties paid out total of goods imported was 46.75 per cent, while the average paid for the tour years ending in 1863, at the close of the rabellion, was only 29.09 per cent, and the average paid in same manner for the fear years ending with 1868, was only 49.30 of Gen Jestoon's first tour found 388 to 1831 inclusive, we find that after alxieon years of profound peace, with no national debt worth raming, the average mad by the consumers of the country on the total amount of imports was 36.87 per cent, or within a per cent, of the highest average paid to the country on the total amount of imports was 36.87 per cent, or within a per cent, of the highest average paid onder the load of the war debt of 1851.4, is 6 per cent, ies than the amount; paid during the war of 1813-16.

Of counse we have not found to the subpression of the rebellion, and that the highest average paid under the load of the war debt of 1851.4, is 6 per cent, ies than the amount; paid during the war of 1813-16.

Of counse we have a total duties under the present reduced tariff, which were into operation on the last of January, 1871, but as the second to the country will really be less than the amount; paid during the war of 1813-18 and the last two years of the Republican administration of General Jackson, and this not with-standing the tremendous war debt which now burdens the country.

There seems to be general desire amount and under the Democratic administration of the tremendous war debt which now burdens the country.

"From the above table," says Mr. Wells, "it will be seen that a sum of gold its annually received into the Treasury from the above few articles sufficient to pay the interest on \$740,00,00 of the national debt, and at the cost of 4 cents per week to each consumer, a tax which practically must be unterly be the uncertainty of the cost of t

A Republican Congress has already reduced the tarill taxe by the estimated sum of \$23,-636,627, and the Republican party is pledged to a still further reduction. As a party, the majority cao, I suppose, honestly express their views by adopting the larnit plant of the National Democratic platform in 1886, as follows:

"That we are in favor of a larnit for revenue and the same as with afford non-declaration to the control of the control of the control of the control of the same as with afford non-declaration tection to downstie manuscipures, and as will, without impairing the revenue, impose the least hurden noos and best fromone and entection to domestic manuschures, and a such equal taxation without lugating the revenue, impose the least burden apon and best promote and current manuschures, and as will so the least burden apon and best promote and current manuschures, and as will be the least burden apon and best promote and current manuschures, and as will be not the worst cond. The true the wight industrial interests of the country man, to a certain extent, been promoted and encouraged in a practical manuscr, is proven in part by the reports made to Congress from time to time by Mr. Wells upon the industrial and agricultural interests of the country. "mail by degrees and beautifully seas," only the smalless and the lessness is at the wrong end; but that doesn't trouble our Democratic speakers a particle, for they have quite as much as they can do to attend to the affairs of the National Government.

The State taxation for the city of Louisville and county of deffersor has also increased in about the same ratio. In 1860 the State tax was \$132,009 40; in 1869 it had increased to \$251,730 60, and in 1870 to \$283,503 79.

The smount of tax per capita has also sargely increased. In 1860 the amount of tax (city and State) in Louisville was \$8 59-103 ior each inhabitant, but in 1870 the amount had increased to over \$17.

There are in Louisville was \$8 59-103 ior each inhabitant, but in 1870 the amount of tax countries took off a portion of the license to the state of the same of the countries took off a portion of the license taxes the city put them all on again, but a good deal heavier.

You can't cut a preson's corne in Louisville without paying for the privilege. The Louisville Democrate call a concentre a chiropodist, and charge him \$10 a year for the use of the name.

In this Democrate city fortune-tellers and astrologers, who are mostly poor women, must pay a license tax of \$300 each, while the wealthy lawyer is let off with \$10. The business of the former is said to be immoral, and so the Democracy will call to their aid the bine laws of Connecticut; they will suppress what they choose to regard as immoral tendencies and practices by oppressive taxition in the metropolis of the State.

But let us turn to the

At that time of the Democratic mode in 1823. At that time that numerous and powerful order of Democratic voters represented by the Five Points and other similar deas of inquity held that the city for four days, and, under the mad impulses of Democratic tresson, uncornt men, women and children were cruelly maltreated, as d many of them murdered in cold blood. As unrestrained mob of Democratic burnt to the ground the humble dwellings of the poor and asylums of the orphan. In those New York mobs of 1838 we had an exhibition of human flendishness, of which, when we read to day, it singes our check with shame and curdles our blood with horror.
